

iOS Application Development

CollegeProfileBuilder3 App

MVP: As a user, I want to be able to click a button on the details view controller and be taken to a new view controller with a map view showing a pin for the specific college's location. The map should automatically center, zoom, and span into the college location.

Stretch #1: As a user, I want to be able to click on the pin showing the college and see the name of the college.

Stretch #2: As a user, I want to be able to search for points of interest within the map view

Stretch #: As a user, I want to see the college's crest instead of a pin for the location of the college.

Skills Used for College Profile Builder 3

1. Creating a mapview
2. Placing pin on mapview
3. Adding accessory to a pin
4. Using mapview delegate methods
5. Adding image to Annotation
6. User Location
